- Which animals live in the grasslands?
- Which animals live in the forest?

ATR2-2-V01

## Vocabulary

- ★ habitat
- ★ ecosystem
- ★ grassland
- ★ land
- ★ contain
- ★ wild
- ★ hawk
- ★ zebra
- ★ survive
- ★ woodpecker

ATR2-2-01

# Land Habitats

Animals live in different places. The place where an animal lives is its habitat. A habitat is also called an ecosystem.

One land habitat is a grassland. A grassland is an area of land that mostly contains grasses. There are wild grasses and few trees.

There are many animals living in the grasslands, including mice, rats, snakes, hawks, eagles, zebras, lions, giraffes, elephants, etc.

A forest is another land habitat. A forest is an area of land with many trees. Many animals need forests to live and survive.

There are many animals living in forests, including

deer, bears, raccoons, foxes, squirrels, snakes, eagles, woodpeckers, etc.

## Animals in the grasslands

mice

elephants

zebras

## Animals in the forests

foxes

deer

raccoons

# Comprehension Checkup

## A Select True or False.
